

FIREARMS AND FAMILY SAFETY

It's a matter of storage

During your well-child visit, your clinician may talk to you about secure firearm storage wherever your child or teen spends time – including your home and the homes of friends and family.

Kaiser Permanente Colorado has teamed up with the S.A.F.E. Firearm (Suicide and Accident Prevention through Family Education) program to provide free cable locks and educational resources during well visits.

We want your feedback! You may receive an invitation to complete a survey about topics discussed in your visit, including firearm storage. For questions, please email us at kpsafe@kp.org.

Scan the QR code or visit safe-firearm.org/resources to access resources about firearm storage.
